HELP US BUILD THE FUTURE

How You Can Help Support Terps Racing EV
Our team is faced with a modern challenge: convert the classic formula-style experience that has been around for decades into something sustainable and clean. With a fully electric, performance-oriented platform at the ready, Terps Racing's Formula SAE Electric contender is designed to extend the limits of what is currently possible in renewable racing. Powered by a custom battery pack and 3 phase electric motor, this year's vehicle outputs over 55 kilowatts at the driveshaft and can accommodate regenerative braking without changes to the electrical system. With a dedicated aerodynamics package and independent front and rear suspension, our vehicle remains planted at speeds in excess of 100 km/h through the tight turns of a race track.

As a sponsor, you have direct access to high-level students for internships, co-ops, and entry-level positions. Members of our team are sought-after by top companies upon graduation and have been employed by companies such as Tesla, Rivian, Ford, Local Motors, NAVAIR, SpaceX, and Blue Origin.
How You Can Contribute

In order to build a new vehicle every year, we need the help of sponsors like you! This could come in the form of:

**Material**
- You can support us by providing material for essential components needed to build and race the car, from raw aluminium to fire-retardant racing gear.

**Manufacturing**
- As much as we love to build everything we can, some things just can’t be done on our college campus. You can help us with machining and tooling for some of the more complicated components of the vehicle.

**General Support**
- You can also help us in other ways, including other services or monetary donations.
As a token of our appreciation for your support, the following recognition tiers are available:

<table>
<thead>
<tr>
<th>Sponsor Level</th>
<th>Amount</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bronze Sponsor</td>
<td>$500</td>
<td>Logo on our website, Access to the Terps Racing resume book, Company stickers in our Terps Racing EV garage</td>
